

□ Hardware Certification Intern – IP-PBX & Firewall Devices

(BIS & MTCTE | Internship → Full-Time Opportunity)

- **Location:** Mohali (Plot 691, Sector 82, Industrial Area)
 - **Duration:** 6 Months
 - **Domain:** Telecom Hardware • Networking Devices • Regulatory Compliance
-

□ About the Internship

Want to work on **real telecom products** instead of dummy college projects?

You will be working **hands-on hardware manufacturing process and certification/compliance of IP-PBX and Firewall devices** that are in process of **BIS and MTCTE certification**.

This internship is designed for students who want to build a **serious career in electronics, telecom hardware, and compliance**—a skillset that very few engineers in India actually have.

- **Top performers will be offered a full-time role after the internship.**
-

□ What You Will Work On

Hardware & Certification Exposure

- Assist in **BIS & MTCTE certification** activities for telecom products
 - Understand **hardware architecture**, block diagrams, and interfaces
 - Support **pre-compliance checks** (power, grounding, labeling, documentation)
 - Help prepare and maintain:
 - BOMs
 - Block diagrams
 - User manuals
 - Compliance & test documents
-

□ Testing & Lab Coordination

- Assist in **internal testing and validation**
- Coordinate with **TEC / STQC / approved test labs**
- Track test cases, results, and observations
- Maintain structured and version-controlled documentation

☐ **Networking & Telecom Basics**

- Basic testing of **Ethernet, SIP, VoIP, firewall interfaces**
 - Functional testing of ports, LEDs, power, and network connectivity
 - Log and reproduce issues during testing
-
-

☐ **Who Can Apply**

Preferred Background

- **B.Tech / BE** in:
 - Electronics & Communication Engineering (ECE)
 - Electronics & Telecommunication
 - Instrumentation / Embedded Electronics
- **Diploma in Electronics** (hands-on candidates welcome)

☐ ☐ **Final-year students or recent graduates preferred**

3rd-year students with strong fundamentals may also apply

☒ **Skills We're Looking For**

- Basic electronics & networking fundamentals
 - Ability to understand **block diagrams & basic schematics**
 - Comfort with documentation (Word / Excel / diagrams)
 - Attention to detail & learning mindset
-
-

+ Good to Have (Not Mandatory)

- Exposure to networking devices or telecom equipment
 - Linux basics / SIP / VoIP awareness
 - Interest in hardware QA, compliance, or product engineering
-
-

☐ **Internship → Job Journey (Clearly Defined)**

Phase 1: Learning Phase (Month 1–2)

- **No stipend**
- Focus on:

- Product architecture
 - Certification workflows
 - Documentation standards
 - Closely mentored, hands-on learning
-

Phase 2: Paid Internship (Month 3–6)

- ☐ **₹15,000 per month stipend**
 - Increased responsibility in:
 - Documentation ownership
 - Testing coordination
 - Certification tracking
 - Performance evaluated on:
 - Technical understanding
 - Ownership & discipline
 - Contribution to certification milestones
-

☐ Full-Time Opportunity

- Successful interns may receive a **Full-Time Offer**
 - **CTC: ₹4 LPA – ₹6 LPA**
 - Based on skills, ownership, and achievements during internship
-

☐ What You Will Gain

- Rare exposure to **BIS & MTCTE certification** (high-value skill)
 - Experience with **real telecom hardware products**
 - Direct mentorship from industry professionals
 - Strong foundation for careers in:
 - Telecom product companies
 - Hardware QA & compliance
 - Networking & embedded systems
-

✗ This Internship Is NOT For

- Candidates looking only for software/coding roles
 - Those expecting purely remote or academic internships
 - Anyone uncomfortable with documentation or lab work
-

☐ How to Apply

Email: hr@nebero.com or whatsapp: 9876662865

Apply with your **resume** and a **short note** answering:

“Why do you want to work on telecom hardware and certification?”

Note : No bond, only 1 month notice period
